

Webmasters Report 2009-2010

The web site has been very busy this year with the additions of "All Our Yesterday's", "Hall Of Fame" "Press & Media" pages added, also a new Video page very recently added which links from a YouTube account www.youtube.com/clevelandchess .

The automated results system has given me some headaches this season as wrong results have been submitted and names been spelt incorrectly, meaning that I have had to go into the server and manually correct them. Also the results score card did not accommodate 4 board matches, this means for example that a score has to be entered for a double default on say board 5, however, this only happened in the KO Cup so was not as concerning if it had been a league result tied into the League Table which would then have needed to be manually corrected!

We have plans for next season to address the above issue's and hopefully make it easier for everyone to submit results.

I would like to thank Keith Smith for his help on the server scripts and sorting out problems quickly and efficiently when they arose.

I would like to thank Bill Wilson for providing free web hosting for the Cleveland Chess Association website and sorting out server side problems very quickly when they arose.

The web site is looking a little dated now and could do with a makeover, bringing it up to date with today's web site formats, however this will be a fairly big task and may take some time. I plan to look at this over the closed season (time permitting).

I hope you have all found the web site informative and a useful tool in keeping up to date with what's going on in Cleveland Chess.

Steve Henderson
CCA Webmaster
